

Appendix C: Dataset and Claim-Case Register

C.1 Purpose

Appendix C records the locked SEC 10-K filing corpus and claim-case dataset used in the main experiment. It documents the filing register, extraction and chunking measurements, smoke-test status, claim-case manifest structure, locked label balance, operational label definitions, scoring rubric and the final 48 claim-cases with filing anchors and ground-truth rationales.

C.2 Filing Register: Main-Run Locked Filing Set

Table C.2 records the six official SEC Form 10-K filings locked for the main experiment, including accession details, methodological role, source URL, estimated token/chunk size and smoke-test status.

Each filing was retained only after source-acquisition, extraction/cleaning, section-coverage, token-size, RAG-chunking and smoke-test checks. The filing set supports cross-section claim construction across varied filing lengths, business models, segment structures, MD&A narratives, risk factors, financial statements and notes.

Table C.2: Filing Register for Locked Main-Run SEC 10-K Corpus

Filing ID	Company / CIK	Accession / dates	Methodological role	SEC document URL	Size / chunks	Smoke-test status
F001	Apple Inc. / CIK 0000320193	Accession 0000320193-25-000079 / filed 2025-10-31 / report 2025-09-27	Technology baseline	https://www.sec.gov/Archives/edgar/data/320193/000032019325000079/aapl-20250927.htm	55,263 est. tokens / 50 chunks	PASS; Items 1, 1A, 7, 7A, 8 present
F002	Amazon.com, Inc. / CIK 0001018724	Accession 0001018724-26-000004 / filed 2026-02-06 / report 2025-12-31	Tech / retail / cloud complexity	https://www.sec.gov/Archives/edgar/data/1018724/000101872426000004/amzn-20251231.htm	78,313 est. tokens / 69 chunks	PASS; Items 1, 1A, 7, 7A, 8 present
F003	JPMorgan Chase & Co. / CIK 0000019617	Accession 0001628280-26-008131 / filed 2026-02-13 / report 2025-12-31	Finance stress case	https://www.sec.gov/Archives/edgar/data/19617/000162828026008131/jpm-20251231.htm	353,892 est. tokens / 294 chunks	PASS; Items 1, 1A, 7, 7A, 8 present
F004	Bank of America Corp. / CIK 0000070858	Accession 0000070858-26-000157 / filed 2026-02-25 / report 2025-12-31	Second finance comparator	https://www.sec.gov/Archives/edgar/data/70858/000007085826000157/bac-20251231.htm	293,868 est. tokens / 227 chunks	PASS; Items 1, 1A, 7, 7A, 8 present
F005	Verizon Communications Inc. / CIK 0000732712	Accession 0000732712-26-000007 / filed 2026-02-17 / report 2025-12-31	Telecom / infrastructure / regulatory complexity	https://www.sec.gov/Archives/edgar/data/732712/000073271226000007/vz-20251231.htm	134,246 est. tokens / 112 chunks	PASS; Items 1, 1A, 7, 7A, 8 present

Filing ID	Company / CIK	Accession / dates	Methodological role	SEC document URL	Size / chunks	Smoke-test status
F006	Ford Motor Co. / CIK 0000037996	Accession 0000037996-26-000015 / filed 2026-02-11 / report 2025-12-31	Automotive / manufacturing / finance-arm complexity	https://www.sec.gov/Archives/edgar/data/37996/000003799626000015/f-20251231.htm	188,394 est. tokens / 161 chunks	PASS; Items 1, 1A, 7, 7A, 8 present

C.3 Claim-Case Manifest Structure

Table C.3: Claim-Case Manifest Field Definitions

Manifest field	Definition
case_id	Unique case identifier such as F001_C01.
filing_id	Links case to the filing register.
company / report date	Human-readable identification of the source filing.
claim_text	Model-facing natural-language claim evaluated under the three-label schema.
expected_label	Ground-truth classification label: Supported, Contradicted, or Insufficient Evidence.
filing_reference_anchors	Section names, item references, financial statement/note anchors or other filing-located evidence anchors.
ground_truth_rationale	Short rationale explaining why the expected label is assigned.
case_type	Coded design category used for balancing, interpretation and qualitative diagnosis, such as cross-section synthesis, numeric consistency, segment consistency, risk-to-MD&A linkage, causal/explanatory claim, missing support, unsupported causal claim, unsupported forward-looking/external claim or business-model/segment claim.
included_in_main_run	Inclusion flag confirming whether the claim-case is part of the locked main-run set.

C.4 Main-Run Claim-Case Count and Locked Label Balance

Label balance is used as a control to reduce trivial majority-class behaviour; claim-cases remain grounded in filing content.

Table C.4: Main-Run Claim-Case Count and Locked Label Balance

Filing	Claim cases	Locked label distribution
Apple Inc.	8	3 Supported / 3 Contradicted / 2 Insufficient Evidence
Amazon.com, Inc.	8	3 Supported / 2 Contradicted / 3 Insufficient Evidence
JPMorgan Chase & Co.	8	2 Supported / 3 Contradicted / 3 Insufficient Evidence
Bank of America Corp.	8	2 Supported / 3 Contradicted / 3 Insufficient Evidence

Filing	Claim cases	Locked label distribution
Verizon Communications Inc.	8	3 Supported / 2 Contradicted / 3 Insufficient Evidence
Ford Motor Co.	8	3 Supported / 3 Contradicted / 2 Insufficient Evidence
Total	48	16 Supported / 16 Contradicted / 16 Insufficient Evidence

C.5 Label Definitions and Claim-Case Types

Table C.5: Operational Label Definitions

Label	Operational definition
Supported	The supplied filing context contains sufficient support for the claim, either within one section or across distributed sections.
Contradicted	The supplied filing context directly conflicts with the claim through semantic, numerical, temporal or segment-level conflict.
Insufficient Evidence	The supplied context is missing, incomplete, ambiguous, too general, or insufficiently specific to support or refute the claim.

The following table records the case-type groups into which the locked claim-cases were divided, based on their logical role in the evaluation design.

Table C.5a: Claim-Case Distribution by Case Type

Claim-case type	Count	Role
cross_section_synthesis	6	General cross-section evidence synthesis across filing sections.
numeric_consistency	12	Numerical and metric consistency across claim and filing evidence.
risk_to_mda_linkage	5	Linkage between risk disclosure and MD&A evidence.
segment_consistency	6	Segment-level consistency across business and reporting disclosures.
causal_or_explanatory_claim	2	Causal or explanatory claim support.
unsupported_causal_claim	6	Unsupported causal claims requiring Insufficient Evidence rather than contradiction.
missing_cross_section_support	5	Claims where required cross-section evidence is incomplete or absent.
unsupported_forward_looking_or_external_claim	5	Unsupported forward-looking, external or guarantee-style assertions.
business_model_and_segments	1	Business-model and segment-description consistency.
Total	48	Complete locked claim-case manifest.

Note: cross_section_synthesis is one specific case-type group. The wider task of cross-section inconsistency detection is also represented through numerical, segment, risk-to-MD&A, missing-support and evidential-sufficiency case types. This table records dataset composition only; misclassified-output counts and error-concentration analysis are reported in Appendix E, Section E.7, Tables E.12b-E.12d.

C.6 Scoring Rubric

Table C.6: Scoring Rubric

Scoring/Review component	Rule
Primary label score	The predicted label is scored as correct only when it exactly matches the locked expected label.
Schema validity	The output must conform to the locked JSON schema and be parseable programmatically.
Evidence-reference review	Filing references are reviewed for relevance and sufficiency when interpreting model reasoning and qualitative error patterns.
Qualitative error coding	Incorrect or weakly grounded outputs are mapped to the predefined qualitative error taxonomy after scoring.

C.7 Locked Main-Run Claim-Case Manifest

C.7.1 Label Balance Check

Table C.7.1: Locked Main-Run Label Balance by Filing

Filing	Company	Supported	Contradicted	Insufficient Evidence	Total
F001	Apple Inc.	3	3	2	8
F002	Amazon.com, Inc.	3	2	3	8
F003	JPMorgan Chase & Co.	2	3	3	8
F004	Bank of America Corp.	2	3	3	8
F005	Verizon Communications Inc.	3	2	3	8
F006	Ford Motor Co.	3	3	2	8
TOTAL	All filings	16	16	16	48

C.7.2 Locked Claim-Cases

The table below is the locked main-run claim-case manifest. The companion CSV file is retained at the following package path and contains the full evidence excerpts, character-position metadata, lock status and post-lock change-control fields for audit:

04_Codebase/CS958-ROUS04-Codebase.zip/CS958-ROUS04-HarjinderSingh/inputs/claims/claim_case_manifest_v1_locked_amendment001.csv

The appendix table records the claim, expected label, filing anchors and ground-truth rationale needed for methodological traceability.

Table C.7.2: Locked Main-Run Claim-Case Manifest

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
---------------	--------	----------------	-----------	------------	--------------------------	------------------------

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
F001_C01	F001	Supported	cross section synthesis	Apple's filing presents its reportable segments on a geographic basis and the MD&A reports 2025 net sales for those same geographic reportable segments.	Item 1 @ chars 25615-25727; Item 7 @ chars 121955-122021	Supported because Item 1 identifies Americas, Europe, Greater China, Japan and Rest of Asia Pacific as reportable geographic segments, and MD&A presents net sales by reportable segment for 2025.
F001_C02	F001	Supported	numeric consistency	Apple reported 2025 total net sales of \$416.161 billion, with iPhone net sales of \$209.586 billion and Services net sales of \$109.158 billion.	Item 7 @ chars 123417-123433; Item 7 @ chars 123614-123635	Supported by the Products and Services Performance table, which lists iPhone, Services and total net sales for 2025 in millions.
F001_C03	F001	Supported	risk to mda linkage	Apple's filing links international business exposure with market-risk sensitivity by disclosing that sales outside the U.S. represent a majority of total net sales and that the company is exposed to interest-rate and foreign-exchange risk.	Item 1A @ chars 39859-39938; Item 7A @ chars 136235-136321	Supported by risk-factor language on sales outside the U.S. and Item 7A disclosure of economic risk from interest rates and foreign exchange rates.
F001_C04	F001	Contradicted	segment consistency	Apple's reportable segments in the filing are product lines: iPhone, Mac, iPad, Wearables/Home/Accessories and Services.	Item 1 @ chars 25549-25613; Item 1 @ chars 25615-25672	Contradicted because the filing states that Apple manages business primarily on a geographic basis and its reportable segments are geographic regions, not product lines.
F001_C05	F001	Contradicted	causal or explanatory claim	Apple states that Services net sales decreased in 2025 because App Store and cloud services declined.	Item 7 @ chars 124419-124468; Item 7 @ chars 124503-124570	Contradicted because MD&A states Services net sales increased in 2025 and attributes the increase partly to higher net sales from advertising, the App Store and cloud services.
F001_C06	F001	Contradicted	numeric consistency	Apple's total net sales for 2025 were \$391.035 billion and Services net sales were \$96.169 billion.	Item 7 @ chars 122332-122357; Item 7 @ chars 123614-123635	Contradicted because those values correspond to 2024 in the table; 2025 total net sales were \$416.161 billion and Services net sales were \$109.158 billion.
F001_C07	F001	Insufficient Evidence	unsupported causal claim	Apple Intelligence directly caused the 2025 increase in Apple's Services net sales.	Item 7 @ chars 124419-124468; Item 7 @ chars 124503-124570	Insufficient Evidence because the filing supports a Services net sales increase and gives specific drivers, but the reviewed filing evidence does not explicitly attribute that increase to Apple Intelligence.
F001_C08	F001	Insufficient Evidence	missing cross section support	Apple discloses the exact number of iPhone units sold during fiscal 2025.	Item 7 @ chars 123857-123895; Item 7 @ chars 123293-123349	Insufficient Evidence because the filing provides iPhone net sales and product discussion, but this case requires a unit-sales count not located in the supplied filing evidence.
F002_C01	F002	Supported	cross section synthesis	Amazon organizes operations into North America, International and AWS, and MD&A uses the same three segments to discuss results of operations.	Item 1 @ chars 35775-35882; Item 7 @ chars 138808-138899	Supported because Item 1 states the three operating segments, while MD&A repeats those same segments for results analysis.

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
F002_C02	F002	Supported	numeric consistency	Amazon's 2025 net sales were \$716.924 billion, including AWS net sales of \$128.725 billion.	Item 7 @ chars 140537-140570; Item 7 @ chars 140515-140535	Supported by the MD&A net sales table, which reports 2025 consolidated net sales and AWS net sales in millions.
F002_C03	F002	Supported	risk to mda linkage	Amazon's filing identifies artificial intelligence as relevant to both its services and its operational uncertainty: AWS offers AI and machine-learning services, while MD&A says technology adoption including AI can affect demand, expenses and benefits in ways that are difficult to predict, isolate and quantify.	Item 1 @ chars 37910-38067; Item 7 @ chars 139403-139552	Supported by Item 1 description of AWS services and MD&A discussion of macroeconomic and technology factors including AI.
F002_C04	F002	Contradicted	segment consistency	Amazon's filing says it has only two operating segments: Retail and AWS.	Item 1 @ chars 35775-35882; Item 1 @ chars 35892-35996	Contradicted because the filing states that Amazon has three segments: North America, International and AWS.
F002_C05	F002	Contradicted	numeric consistency	Amazon's AWS net sales were \$107.556 billion in 2025.	Item 7 @ chars 140515-140535; Item 7 @ chars 140402-140445	Contradicted because the net sales table shows AWS at \$128.725 billion for 2025; \$107.556 billion is the 2024 amount.
F002_C06	F002	Insufficient Evidence	unsupported causal claim	Amazon's 12% increase in 2025 net sales was caused primarily by its artificial intelligence initiatives.	Item 7 @ chars 140951-140978; Item 7 @ chars 139403-139470	Insufficient Evidence because MD&A reports 12% sales growth and separately discusses AI initiatives and uncertainty, but the filing does not explicitly attribute the consolidated 2025 sales increase primarily to AI initiatives.
F002_C07	F002	Insufficient Evidence	missing cross section support	Amazon discloses the exact number of global Prime members at December 31, 2025.	Item 1 @ chars 36867-36901; Item 1 @ chars 36837-36858	Insufficient Evidence because the filing discusses Amazon Prime as a subscription service, but the supplied filing evidence does not provide the exact global Prime member count required by the claim.
F002_C08	F002	Insufficient Evidence	unsupported forward looking or external claim	Amazon's filing states that AWS had a larger 2025 cloud-infrastructure market share than Microsoft Azure and Google Cloud combined.	Item 7 @ chars 142165-142196; Item 1 @ chars 37910-37972	Insufficient Evidence because the filing reports AWS sales and describes AWS services, but it does not provide the external comparative market-share statement asserted in the claim.
F003_C01	F003	Supported	cross section synthesis	JPMorganChase's filing describes the firm as a global financial services firm with \$4.4 trillion in assets and three reportable business segments: CCB, CIB and AWM.	Item 1 @ chars 240356-240440; Filing text / embedded MD&A or note section @ chars 437553-437618	Supported by the business overview and business-segment description in the filing.
F003_C02	F003	Supported	numeric consistency	For 2025, JPMorganChase reported managed-basis total net revenue of \$185.581 billion and provision for credit losses of \$14.212 billion.	Filing text / embedded MD&A or note section @ chars 479223-479262; Filing text / embedded MD&A or note section @ chars 429375-429409	Supported by the managed-basis reconciliation table in the filing, which lists total net revenue and provision for credit losses for 2025.

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
F003_C03	F003	Contradicted	segment consistency	JPMorganChase reports only two business segments, CCB and CIB, and excludes Asset & Wealth Management from reportable business segments.	Filing text / embedded MD&A or note section @ chars 437553-437618; Item 1 @ chars 242753-242778	Contradicted because the filing states there are three reportable business segments: CCB, CIB and AWM.
F003_C04	F003	Contradicted	numeric consistency	As of December 31, 2025, JPMorganChase had \$362.4 billion in assets and \$4.4 trillion in stockholders' equity.	Item 1 @ chars 240356-240440; Item 1A @ chars 392280-392303	Contradicted because the filing gives the reverse: \$4.4 trillion in assets and \$362.4 billion in stockholders' equity.
F003_C05	F003	Contradicted	business model and segments	The filing classifies Consumer & Community Banking as one of JPMorganChase's wholesale business segments.	Filing text / embedded MD&A or note section @ chars 437749-437792; Filing text / embedded MD&A or note section @ chars 437798-437852	Contradicted because the filing states that CCB is the consumer business segment, while CIB and AWM are the wholesale business segments.
F003_C06	F003	Insufficient Evidence	unsupported causal claim	JPMorganChase's 2025 total net revenue increased because artificial intelligence adoption improved productivity across all business segments.	Filing text / embedded MD&A or note section @ chars 479223-479262; Item 1 @ chars 243330-243366	Insufficient Evidence because the filing provides segment and revenue information, but the reviewed evidence does not explicitly attribute total net revenue change to AI-driven productivity across all segments.
F003_C07	F003	Insufficient Evidence	missing cross section support	JPMorganChase discloses exact 2025 market-share percentages for each of investment banking, consumer banking and asset management.	Item 1 @ chars 240466-240508; Filing text / embedded MD&A or note section @ chars 238670-238681	Insufficient Evidence because the filing describes competitive position and business activities, but the exact multi-business market-share percentages required by the claim are not present in the supplied filing evidence.
F003_C08	F003	Insufficient Evidence	unsupported forward looking or external claim	JPMorganChase guarantees that its Security and Resiliency Initiative will reduce operational losses in 2026.	Filing text / embedded MD&A or note section @ chars 449048-449082; Filing text / embedded MD&A or note section @ chars 427022-427048	Insufficient Evidence because the filing mentions the Security and Resiliency Initiative, but the supplied evidence does not provide a guarantee of reduced 2026 operational losses.
F004_C01	F004	Supported	cross section synthesis	Bank of America's filing describes it as one of the world's largest financial institutions and identifies four business segments: Consumer Banking, GWIM, Global Banking and Global Markets.	Item 1 @ chars 299504-299572; Item 1 @ chars 302529-302570	Supported by Item 1, which provides the business overview and segment structure.
F004_C02	F004	Supported	numeric consistency	Bank of America's Consumer Banking segment reported 2025 net income of \$12.245 billion and total revenue, net of interest expense, of \$43.673 billion.	Item 1 @ chars 508629-508677; Item 1 @ chars 509105-509124	Supported by the Consumer Banking table in MD&A.
F004_C03	F004	Contradicted	segment consistency	Bank of America has three business segments and does not include Global Markets as a segment.	Item 1 @ chars 302529-302570; Item 1 @ chars 302622-302657	Contradicted because the filing lists four business segments and explicitly includes Global Markets.

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
F004_C04	F004	Contradicted	numeric consistency	Bank of America's Consumer Banking net income was \$10.759 billion in 2025.	Item 1 @ chars 509105-509133; Item 1 @ chars 302554-302570	Contradicted because the Consumer Banking table reports \$12.245 billion for 2025 and \$10.759 billion for 2024.
F004_C05	F004	Contradicted	risk to mda linkage	Bank of America states that market risk is inherent only in Global Markets and that other areas of the Corporation are not exposed to market risk.	Item 7 @ chars 686508-686553; Item 7 @ chars 686555-686623	Contradicted because the filing says market risk is primarily within Global Markets but also exists in other areas such as ALM activities.
F004_C06	F004	Insufficient Evidence	unsupported causal claim	Bank of America's increase in active mobile banking users was caused by artificial intelligence features added during 2025.	Item 1 @ chars 513703-513765; Item 1 @ chars 513796-513850	Insufficient Evidence because the filing notes active mobile banking user growth and client preference changes, but the supplied evidence does not attribute that growth to AI features.
F004_C07	F004	Insufficient Evidence	missing cross section support	Bank of America discloses the exact number of employees located in the United Kingdom at December 31, 2025.	Item 1 @ chars 469289-469333; Item 1 @ chars 469434-469477	Insufficient Evidence because the filing provides total headcount and geographic operations, but the reviewed evidence does not provide the exact U.K. employee count asserted by the claim.
F004_C08	F004	Insufficient Evidence	unsupported forward looking or external claim	Bank of America commits to closing all retail financial centers by the end of 2026.	Item 1 @ chars 469625-469669; Item 1 @ chars 513852-513897	Insufficient Evidence because the filing discusses its retail banking footprint and changes in financial centers, but the supplied evidence does not contain the asserted commitment to close all centers by 2026.
F005_C01	F005	Supported	cross section synthesis	Verizon operates two reportable segments, Consumer and Business, and the Consumer segment generated \$106.8 billion of revenue, about 77% of consolidated revenues, in 2025.	Item 1 @ chars 93750-93836; Item 1 @ chars 94697-94744	Supported by Item 1 segment disclosure and segment revenue information.
F005_C02	F005	Supported	numeric consistency	Verizon's consolidated operating revenues were \$138.191 billion in 2025, up \$3.403 billion, or 2.5%, from 2024.	Item 7 @ chars 191259-191324; Item 7 @ chars 191326-191379	Supported by the Consolidated Operating Revenues table in MD&A.
F005_C03	F005	Supported	risk to mda linkage	Verizon discloses market-risk exposure to interest-rate and foreign-exchange changes and states it uses derivatives for risk-management objectives rather than trading purposes.	Item 7A @ chars 295447-295537; Item 7A @ chars 295880-295927	Supported by Item 7A market-risk disclosure.
F005_C04	F005	Contradicted	segment consistency	Verizon reports three operating segments: Consumer, Business and Media.	Item 1 @ chars 93758-93781; Item 1 @ chars 96568-96589	Contradicted because the filing states Verizon has two reportable segments: Consumer and Business.
F005_C05	F005	Contradicted	numeric consistency	Verizon's Business segment operating revenues increased by \$462 million, or 1.6%, in 2025.	Item 7 @ chars 191145-191180; Item 7 @ chars 191478-191519	Contradicted because the Consolidated Operating Revenues table shows Business revenues decreased by \$462 million, or 1.6%, in 2025.

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
F005_C06	F005	Insufficient Evidence	unsupported causal claim	Verizon's 2025 Consumer revenue increase was caused primarily by artificial intelligence automation in its network operations.	Item 7 @ chars 191099-191141; Item 1 @ chars 105696-105713	Insufficient Evidence because the filing supports Consumer revenue growth and separately discusses network technologies, but the supplied evidence does not explicitly attribute the Consumer revenue increase primarily to AI automation.
F005_C07	F005	Insufficient Evidence	missing cross section support	Verizon discloses the exact number of 5G network cell sites active at December 31, 2025.	Item 7 @ chars 184141-184162; Item 1 @ chars 106341-106364	Insufficient Evidence because the filing discusses 5G/4G LTE and network densification, but the supplied evidence does not provide the exact active 5G cell-site count required by the claim.
F005_C08	F005	Insufficient Evidence	unsupported forward looking or external claim	Verizon guarantees that the Frontier transaction will increase consolidated operating revenues in 2026.	Filing text / embedded MD&A or note section @ chars 9471-9479; Item 1 @ chars 128155-128170	Insufficient Evidence because the filing mentions Frontier as a recent development, but the supplied evidence does not guarantee a 2026 consolidated revenue increase from that transaction.
F006_C01	F006	Supported	cross section synthesis	Ford describes Ford Blue, Ford Model e and Ford Pro as customer-centered business segments and separately provides financial services through Ford Credit.	Item 1 @ chars 120189-120241; Item 1 @ chars 120663-120724	Supported by Item 1 business description.
F006_C02	F006	Supported	numeric consistency	Ford reported 2025 revenue of \$187.267 billion and a net loss attributable to Ford Motor Company of \$8.182 billion.	Item 7 @ chars 345104-345133; Item 7 @ chars 341532-341594	Supported by MD&A company key metrics and results of operations.
F006_C03	F006	Supported	risk to mda linkage	Ford discloses exposure to foreign currency exchange rates, commodity prices and interest rates, and Item 7A states these exposures are managed through its overall risk-management program.	Item 7A @ chars 479876-479967; Item 1A @ chars 255153-255184	Supported by risk/market-risk disclosures in Item 7A.
F006_C04	F006	Contradicted	segment consistency	Ford Model e was profitable in 2025, reporting positive EBIT of \$4.806 billion.	Filing text / embedded MD&A or note section @ chars 117344-117364; Item 7 @ chars 349360-349385	Contradicted because the filing reports a Ford Model e EBIT loss of \$4.806 billion for 2025.
F006_C05	F006	Contradicted	causal or explanatory claim	Ford Blue's 2025 revenue increased from 2024 because wholesales increased.	Filing text / embedded MD&A or note section @ chars 117323-117340; Item 7 @ chars 348278-348313	Contradicted because the filing states Ford Blue revenue decreased 1% and wholesales decreased 5% from a year ago.

Claim-Case ID	Filing	Expected label	Case type	Claim text	Filing-reference anchors	Ground-truth rationale
F006_C06	F006	Contradicted	numeric consistency	Ford Pro's 2025 revenue was \$101.019 billion.	Filing text / embedded MD&A or note section @ chars 117323-117340; Filing text / embedded MD&A or note section @ chars 116618-116634	Contradicted because \$101.019 billion is Ford Blue's 2025 revenue; Ford Pro's 2025 revenue was \$66.286 billion.
F006_C07	F006	Insufficient Evidence	unsupported causal claim	Ford's 2025 net loss was caused primarily by tariffs rather than special items related to Model e impairment and EV program cancellations.	Item 7 @ chars 346822-346904; Item 7 @ chars 348998-349018	Insufficient Evidence because the filing discusses tariffs and also states the year-over-year net income decrease was primarily driven by higher special items and lower Ford Blue/Ford Pro EBIT; the supplied evidence does not support the tariff-primary causal claim.
F006_C08	F006	Insufficient Evidence	unsupported forward looking or external claim	Ford guarantees that Ford Model e will be EBIT-positive in 2026.	Item 7 @ chars 349900-349958; Filing text / embedded MD&A or note section @ chars 117710-117736	Insufficient Evidence because the filing reports Ford Model e's 2025 EBIT loss and discusses forward-looking statements, but it does not provide the asserted guarantee.
